## Lindbergh Child Found Dead

### Body of Kidnapped Child Found by Neighbor Near the Lindbergh Home.

Stop Press News—Information that the Lindbergh child, Charles Augustus Jr., kidnapped March 1, had been found dead, near the Lindbergh home, was broadcast by radio today (March 12).

### OBITUARY

(The following obituary is copied from a Charlottetown, P.E.I. paper.)

GEORGE H. MACNEILL

The death occurred at Oyen, Alta., on April 16th, of George H. MacNeill, aged 53. On the previous day relatives on the Island received a telegram stating that he was seriously ill with pneumonia and the next despatch brought the sad news of his death.

The late Mr. MacNeill was the son of William MacNeill and the late Mrs. MacNeill of Milton. For several years he taught school in this province and then went to Western Canada. He was for a time at Winnipeg and several years in Regina before removing to Oyen. While in the west he carried on a real estate and insurance business.

Mr. MacNeill was a man of splendid character and held in the highest esteem. He was unmarried.

He leaves to mourn his father who is with his daughter in Charlottetown, four brothers, Torquil in Milton, Lemuel in Charlottetown, Ethelton in Brockton, Mass., and Bruce in Success, Sask., also three sisters Mrs. Wm. Eumam, New Glasgow Road, Mrs. Daniel Ward, Kingston, and Mrs. Alfred Allcock, Charlottetown.

The body was brought to Charlottetown on Saturday evening and the funeral took place from the residence of his brother-in-law, Mr. Allcock, Sunday afternoon to the Presbyterian Cemetery at Highfield. Services at the home and at the grave were conducted by Rev. G. Carlyle Webster, pastor of Zion Church.

The pallbearers were Wallace MacNeill, Daniel Cummings and Wm. Moore of Milton, and Chas. E. MacDuff, Fredrick Dohar and Brenton Dohar of Brookfield.

### Trees Make Wonderful Growth

While trees have been in bud for at least two weeks, it is only during the last few days that they have been showing green at a distance. The poplars in town are looking beautiful now and other trees and shrubs are rapidly being adorned in their lively spring foliage. Lilacs are showing a healthy growth and give promise of heavy bloom. The weather during the last week has been unusually warm and plant life has been really bursting into foliage during the fore part of this week.

### No Wheat Bonus 1932

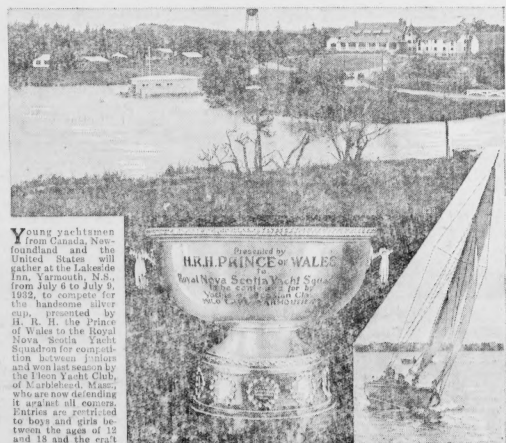

A motion to continue the five cent bonus on export wheat was defeated in the House of Commons yesterday. A suggestion that a bonus based on seeded acreage, also failed to find favor.

### Softball Players to Organize

A meeting of softball players has been called for Monday evening at Johnson's Garage, to arrange teams and draw a schedule of games. All interested are asked to be present.

Look At Your Address Label

### Young Yachtsmen to Meet at Yarmouth, N.S.

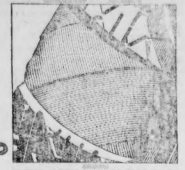

Young yachtsmen from Canada, Newfoundland and the United States will gather at the Lakeside Inn, Yarmouth, N.S., from July 6 to July 9, 1932, to compete for the handsome silver cup, presented by H. R. H. the Prince of Wales to the Royal Nova Scotia Yacht Squadron for competition between yachtsmen and won last season by the Ebon Yacht Club, of Northbrook, Mass., who are now defending it against all comers. Entries are restricted to boys and girls between the ages of 12 and 18 and the craft used are Marconi equipped yachts of the new "Arcadian" class, built last year for the Lakeside Inn and the Lakeside Yacht Club. Sailing will take place on Mill Lake, adjoining the hotel, which is the Canadian Pacific Railway's latest link in a vast chain of hotels across Canada, and a record attendance of contestants and spectators is expected from all the representative yachting or sailing organizations of their country. The pictures show the beautiful hotel, in its ideal setting; a typical yacht and the much-coveted cup, itself.

### GOODYEAR PRIZE CONTEST

**\$3000 CASH**

1st prize — \$1,000.00 cash  
2nd prize — \$500.00 cash  
3rd prize — \$300.00 cash  
4th prize — \$100.00 cash  
5 prizes, each \$50.00 cash  
104 prizes totalling \$5,000.00

HOW MANY SUPER TWIST CORDS

Someone is going to walk home with that \$1,000.00 for just estimating the number of cords in the average Goodyear Tire. Why don't you take a few minutes to make an estimate? It won't cost you a cent and you have as good a chance as anyone else to be one of the winners.

Anyone from a household where a car is owned may enter except tire dealers, employees of rubber companies and the families of both. There is no entry fee, nothing to buy, no special requirement.

See the six Goodyear Tires of various sizes, types and ply-thicknesses on display here. Then estimate the number of cords in each, find a total, and divide by six to strike the average. Submit the number you estimate on a standard entry blank, obtainable from the undersigned.

Closing date June 5th, 1932. Address: "The Goodyear Superlatist Cord Contest," New Toronto, Toronto 14, Ontario.

Come in and see Super Twist Cords demonstrated and get a helpful booklet of contest directions.

## Teamwork

The one word or term embodying the thing most needed now and most likely to be needed in an increasing way for the long pull back to more satisfactory economic and business conditions is, in our opinion, "Teamwork." If there ever was a time when the call for "the long pull and the strong pull together," that time is now.

A farmer following his horses as he guides a plough along the furrows knows what teamwork on the part of the horses means; also, the work between the horses and the ploughman. Possibly he realizes the full value and necessity of such teamwork in an even more striking manner when it is lacking, and, as the outcome, poorer results are not being achieved.

Men participating in the many fields of sport have a full appreciation of the value of teamwork. Every successful captain of a team drills it into his men. But how frequently one reads that such-and-such a team, well composed of brilliant and superior individual players, lost out in an individually inferior team because of a lack of co-ordinated effort—in a word, teamwork. And this lack of teamwork of too frequently results because we are more of these individually brilliant players desire to keep themselves in the "spotlight," play to the gallery, and win plaudits for themselves rather than for the team as a whole.

Success in military exploits depends to a very large extent upon teamwork, the co-ordination of every arm of the service to the achievement of one common object, the co-operation of each unit with every other unit, both in preparation and final action, to the end that victory be won. Without this "union in service" the bravest men in the world are likely to suffer defeat at the hands of an inferior but more united force. Victory does not always rest with the big battalions, but with the compact body which moves and acts with precision as one man.

The same principle applies with equal truth and power in the realm of the rational, political, and community life. If in an army the artillery cannot, and it alone, was the effective instrument in winning battles and instead of co-operating with the infantry, tanks, machine-guns, and other aircraft, actually ignored and even fought against them, the enemy would win. Yet, how often groups of people having a common object in community effort or in the political arena instead of working together to achieve that object, actually oppose each other solely because they do not agree upon every detail of their programme, nor see eye to eye as to the methods by and through which the reforms desired by all are to be brought about. And the result, of course, is victory for the other group or policy to which they are all opposed.

There are many time-honoured maxims which point the truth that teamwork is essential to success. "In union there is strength," "United we stand, divided we fall," while for the enemy forces there is always the other maxim: "Divide and rule."

Teamwork can only be brought about by a willingness to compromise. Some good people regard the word "compromise" as something essentially wrong, as a great evil. True, right cannot compromise with wrong, nor honesty with dishonesty, but where two are striving for what both believe to be right, and in opposition to what they are agreed is unwise or wrong, it is the height of folly to divide into camps and opposing camps, weakening each other and the cause they both desire to advance, simply because of minor differences of opinion as to exact objective to be achieved or the methods by which it should be achieved. United is compromise, rather than each one insisting upon acceptance of their views to the exclusion of others, failure for both must inevitably follow and victory be recorded for the common enemy.

The experiences through which the world is passing have impressed a majority of people with the need for more or less radical changes in our economic and social structure. That change is necessary is fairly well recognized, but some desire to move much more rapidly and drastically than others; some believe that the only way to bring about such change is through force, again, advocate something else. All want improvement, reform. But through divided councils, lack of co-operation, in a word, an absence of teamwork, nothing but confusion has thus far resulted, while those minorities who are more or less satisfied with things as they are, by working together, are enabled to dominate.

This condition prevails in society, business, community effort, in municipal, provincial, and international politics. It is even found in family life. It is fatal to progress, a continually delaying factor in the onward march of reform.

What the world needs today is not antagonism, but mutual sympathy; not competition, but co-operation; not isolated effort, but co-ordination of effort; not single-handed play, but teamwork. And these things can only be brought about by compromise, by compromise, and devotion, mutual strength through teamwork. The world will then begin to get somewhere, and out of the slough of depression in which it continues to founder.

## New Weapon For Surgery Trans-Canada Highway

## Estimates Announced

## Operation To Remove Cancerous Lung Was Successfully Performed

For the first time in the history of surgery and the treatment of cancer, an entire lung, with a cancer in it, has been removed by the use of the knife, and the patient cured. This was made known in an interview with Dr. A. L. Lockwood of the Lockwood Clinic, who has returned to Toronto from the annual meeting in Ann Arbor, Mich., of the American Society of Thoracic Surgeons, where the disclosure was made.

During the society's three-day meeting, details of this extraordinary operation were revealed in detail by Dr. Edward D. Churchill of Boston, Mass., who performed this feat of surgery. The patient's chest was lifted, and all three lobes of the right lung, the centre lobe containing the cancer, were cut out entirely away.

Dr. Churchill's case, it was demonstrated, had made it clear that there was no further site of cancer which could be dealt with surgically, with in the past could not be so dealt with at all.

Believed to have been burning from 10 to 15 years a fire has just been discovered under a hospital at Stoke-on-Trent, England.

Skishatchewan now has 136,571 farms and Alberta 97,625.

## Palpitation of the Heart Could Hardly Get Around

Mrs. Charles Storch, R.R. 4, Petoskey, Ont., writes: "I was troubled with palpitation of the heart, especially at night, and was so weak I could hardly get around."

After taking Milburn's Heart and Nerve Pills, she greatly relieved of these attacks. My mother also has great faith in them and she says the medicine can help her so much for heart trouble.

It can assure you that Milburn's Heart and Nerve Pills are a wonderful builder.

Sold at all drug and general stores, on mail order on receipt of price by The T. Milburn Co., Ltd., Toronto, Ont.

Price 50c a box

## Plane Surprises Natives

## Days of Borneo Wanted To Know If Flying Machine Laid Eggs

The head-hunting Days of Borneo were so intrigued at the sight of their first aeroplane that they wanted to know whether it laid eggs.

Richard Haliburton, of Memphis, who is on a holiday flight around the world, told the story to associates in New York in a cable from Manila.

The Tennessee flyer's message said he had arrived at Manila at the end of a 40,000-mile flight and had spent three weeks in Borneo with his plane, the "Flying Carpet," visiting the head hunting Days, who never had seen an aeroplane.

"Took the chief flying in native undress, except for goggles," the cablegram said. "Apparently big event in Days's history. War boats were filled with warriors who came 100 miles to see the chief fly. Days asked if aeroplane laid eggs?"

## Used Ancient Seed

## Green Peas From King Tut's Tomb Cultivated Near Port Arthur

Green peas, King Tutankhamen's own favorite bean, are growing today in Pease Lake 25 miles north of Port Arthur. Mr. Pejstrup is the possessor of more than two hundred of them grown on one acre.

A year ago Mr. Pejstrup visited his home in Denmark and while there purchased a solitary pea for \$25. He tells that six peas were brought from the tomb of King Tut in Egypt by a Danish missionary and sold for amounts varying from \$25 to \$30, and the one purchased by Mr. Pejstrup was planted here in the Danish settlement last summer.

The stalk of the pea was about five feet tall topped with a cluster of multi-colored flowers. The stem being about half an inch in diameter. From the entire pea plant a yield of over 200 was obtained.

## What the automobile has taught women about household lubrication

Experience with motor cars has taught women that motor parts must be protected against wear by a thin film of oil. This is a lesson learned, however, that moving parts of sewing machines, vacuum cleaners, lawnmowers, washers and other mechanical devices must also be protected against wear by a thin film of 3-in-One oil not only lubricates; it also cleans and protects. It is different from all others, because it is a scientific blend of three high grade oils—animal, mineral and vegetable. 3-in-One is the oil you should use on mechanical equipment if you want best results.

Buyer's idea your expensive household by using oil that does only half the job. Insist on the old reliable 3-in-One. It costs little more to buy and much less to use. At good stores everywhere. For your own protection, look for the trade mark "3-in-One" printed in red on every package.

## A Sincere Compliment

## New Year Was Sized Up As Real Good Sport

The new year paid a call on the most wealthy of his parishioners, who was delighted to find that the clergyman was a man of such broadmindedness and tolerance. He immediately relented the restricted air passage as thousands can testify. It is said by dealers everywhere.

Like a girl at the throat. For a man that is not clean in his eyes could there be probably none so much as a terrible suffering than asthma. Sleep is impossible and the patient becomes exhausted and finally, though the patient is left in a state of distress, the return of Dr. D. K. Kellogg's Asthma Remedy is a wonderful relief agent. It immediately relieves the restricted air passage as thousands can testify. It is said by dealers everywhere.

## Cabled His Buff

The time had come to dish up the ration, and in an Irish regiment the quartermaster and his aide were busy in preparing for distribution.

The assistant turned to the quartermaster and with a twinkle in his eye said: "Av ye plase, now, there's a loaf short, whor'll I give it to?" "Keep it yourself," Mike replied the quartermaster.

Came to the small province of Camero, Africa, now number 46, 000.

Poison ivy is most virulent at the flowering season.

Of the 92 chemical elements, 47 of them were found in the sea.

It pays in pleasure—and pays in actual cash.

For Turret Fine Cut is fragrant, mellow Virginia tobacco, that rolls into thoroughly satisfying cigarettes. You can roll at least 30 cigarettes with a 25c package.

FREE Chanticleer cigarette papers with every package.

Cigarette Tobacco

## Radioium Found In Ocean

## Scientist Claims Vast Stores Are Deposited At Bottom Of The Sea

Vast stores of radium caked in Daisy Jones' locker were described by scientists before the American Geophysical Union. Sediments on the bottom of the Pacific Ocean are from four to nearly 12 inches as rich in radium as ordinary rocks on dry land, according to figures quoted by C. S. Piggott, based on samples dredged up from the sea floor. The most radium is in the deeper parts of the ocean bottom, remote from land, and Piggott estimated the total hidden there at about a billion tons.

The radium is sent to the bottom mostly by oxidation in the sea water, while some is carried down by skeletons of tiny sea creatures and dust particles, he explained.

Persian Balm—the peerless aid to loveliness. Delightfully fragrant. Dainty to use. Leaves no stickiness. A little gentle rubbing and it is swiftly absorbed by the tissues. Tonic in effect. Soothes and dispels roughness and chapping. Keeps skin moist and velvet-textured. Unrivaled for its distribution. Refillment. Used by lovely women everywhere to preserve and enhance their natural beauty.

## Keep On Working

## Despite Disarmament Talk New Wars Being Invented

Just as a will to the disarmament discussions, we suppose you noticed that Haddfield, Limited, munition manufacturers of Sheffield, England, have developed a high explosive shell that will pierce the best quality of armor plate one foot thick, with a distance of ten miles.

Wages in London talks much of disarming, the men who sit at back and invent new schemes for killing millions keep right on working—and producing results.

A new highway machine invented by an Iowa, digs up the surface of old gravel roads, mixes the material with a bituminous binder and spreads the mixture back on the road again.

## Cried at Night

"Night after night, as soon as we would get settled in bed, baby would cry. . . BABY'S OWN TABLETS changed all this. What a blessed relief," writes Mr. Arthur Baker Jr., Wisconsin. "Ota Give Tablets for testing troubles, colds, fever, teething, etc. . . . Safely SAFE. 25c.

Dr. Williams' BABY'S OWN TABLETS

**Stop and Think!**  
it pays to **"ROLL YOUR OWN"** with

15c and 20c packages—also in 1/4 lb. vacuum tins

## Split the Atom

## Scientists Pave the Way For Transmuting One Element Into Another

Two British scientists have at last "split the atom," paving the way for transmuting one element into another, the goal of alchemists many centuries ago, and the dream of modern chemists.

Dr. P. D. Cockcroft and Dr. E. T. S. Walton reported the result of experiments in the Cavendish laboratory which culminated in the transmutation of hydrogen atoms into helium atoms, by bombarding them with electric particles.

Dr. Cockcroft said he and his colleague bombarded hydrogen atoms with a voltage of 120,000 and that under the bombardment the hydrogen atoms began to break up into helium, a still rarer gas. The helium atoms, he said, came out of the bombardment with energies of 160 to 160 times that of the particles used to break them.

Only one particle broke up, however, for every 10,000,000 particles used to bombard it, he said.

Optimistic scientists have long hoped to split an atom, some contending that when this feat was accomplished a boundless source of energy would be available. There have been extremists who feared the accomplishment would mean the hurrying of the world to destruction.

"It is difficult to say what this discovery may mean," Lord Rutherford said. "Up to the present the experiments have not yielded anything which will be of immediate commercial value."

## China Leading Customer

China is the leading customer for complete aircraft made in the United States. In both 1929 and 1931 China led the lead over all other countries. The Chinese like American machines because their territory bears a remarkable similarity in flying conditions to those in the United States.

Worms feed upon the vitality of humans and endanger their lives. A simple and effective remedy is Molar-Gro Worm Exterminator.

## Too Hot For the Wife

A farmer appeared the other day at a theatre that is accepting two dozen eggs as the price of admission. He handed a paper sack to the ticket-taker.

"There's a couple of dozen eggs, mister," he said. "I want to see your show. I'd have brought the missus with me if the hens had shelled out a little better."

China, the most populous nation in the world, had 479,821,000 inhabitants in 1930. That country has 1104 provinces for each square mile of land area.

## Danger In Worn Tires

## If Used At All Should Be On Rear Wheel

It has been pretty definitely established that the rear right tire is the first to wear out, the rear left next, the front right next, and the front left last of all.

As a result, practice has become almost general to shift the worn-out rear tires to the front wheels with the idea of evening up the wear. This, however, is dangerous. When a worn tire blows out on a rear wheel while the car is travelling at a high rate of speed, the driver still has enough control of the front wheels to guide the car safely out of a dangerous skid.

When, however, a front tire lets go, and the car is moving fast, there is almost nothing the driver can do. The steering is thrown out of his control, the car is forced into a serious skid, and there are great possibilities of injuries to all in the car.

Rather have a worn tire on a rear wheel, even though it will wear down so much faster, than risk it to the front. For greater safety, however, a tire that shows the first mark of a tread worn down to the fabric should be taken off and used only as a spare.

Even as a spare, it should be in such a position as to get a good replacement.

Suffering in silence is more fun if you explain it, you're doing so nobody will miss it.

Large shipments of construction materials continue to arrive in Manchuria.

**Baby's Own Soap**  
BEST FOR YOU and BABY too  
W. N. U. 1941

## TABLE REPORT ON CLOSING OF MANITOBA BANK

Winnipeg, Man.—A majority report of a special legislative committee, tabled in the Manitoba House, said it would not have been necessary to close the Manitoba Provincial Savings Office if the Dominion Government had given the necessary guarantees, sought by Premier John Bracken.

The committee was appointed to inquire into circumstances surrounding the office's closing by the Manitoba Government in March. Accounts of the office were taken over by the chartered banks.

Two Conservative members of the legislature, one Manitoba member of parliament, and three prominent Winnipeg men are named in the report as persons who had been the rumormongers, causing a run on the government-owned office which eventually led to its closing.

They are Erick Wills, Conservative member of parliament for Souris; John T. Haig and F. V. Newton, Conservative members of the legislature; Valmore Schwartz, provincial organizer for the Conservative party; Dr. L. B. Wilmet and Dr. C. Rice.

The Dominion would not have assumed any greater responsibility in guaranteeing deposits in the Savings Office than it did when it guaranteed the banks, the report sets out.

Refusal of the Dominion to grant these guarantees at the request of the province, the report declares, "can be justified in view of the guarantee given later by it to the banks, and in view of the assistance given to other provinces."

The committee found that the business of the Savings Office was normal up until about January 11, 1933, when "unusual withdrawals of deposits commenced as a result of rumors." The run on the office was attributed by the committee to "rumors" that the office was unsound.

"They were in part," states the report, "the result of a deliberate and organized campaign."

The report was signed by the five government members of the committee, appointed to inquire into the closing of the office, and S. J. Farmer, Laborer; Sanford Evans and J. O. McLean, members of the legislature, who are expected to table a majority report.

## Government Control Of Radium Considered

Information Given To Senate By Hon. Arthur Meighen

Ottawa, Ont.—Government control of radium production and conservation is having the "immediate and earnest" consideration of the government, Right Hon. Arthur Meighen, leader of the Senate, told that body.

The danger of a mining rush into the Great Bear Lake region of Canada's North West Territories, a thousand miles north of civilization, with the possibility of winter over-taking the men before they could get out, was feared by Senator Meighen.

He urged the government to take such measures as will ensure no man going in who had not made proper provision for getting out.

Receive Flower Seeds  
Toronto, Ont.—Flowers will bloom again in drought-stricken western Canada. A letter received by W. L. Aiken, Toronto, originator of the idea of despatching flower seeds to western Canadians, expressed gratitude for the thoughtfulness of Ontario people.

The letter was signed by C. R. Davis, general manager of the Saskatchewan Relief Commission.

U.S. Taxes All Cheques  
Washington, D.C.—A bill rate of four cents on the sale of each \$100 bond was voted by the United States senate finance committee. The rate was the same as set for stock sales.

The committee made all cheques subject to the two-cent tax. The system the \$5 exemption allowed in its original proposal.

Great Britain To Reply  
London, England.—Sir John Simon, Secretary for Foreign Affairs, told parliament that Great Britain expects to reply soon to the system of the United States.

He said that the system of the United States proposed that debt payments expended under the Hoover moratorium should be made in annual installments.

This concrete rods of large spans can now be built with no intermediate supports as a result of a new system of reinforced concrete construction.

W. N. H. 1941

## Adventurous Cruise

Small Vessel To Sail For Southern Seas In Search Of Treasure

Toronto, Ont.—Bound south, the 60-foot auxiliary schooner "Wanderer" will dip her flag in farewell to Lunenburg, N.S., in a few weeks on an adventurous cruise. Skipped by Lieutenant-Commander Geoffrey Coyne, of Toronto, the little vessel will follow a long itinerary. The only woman in the crew is Mrs. Coyne, while Frank Everett, her brother, and Murdoch Kirby are the other principals in what is hoped to be a search for treasure in the South Sea islands.

The party is to search for treasure in the Cook Islands and collect data on the Hakkaido—the mysterious race said to inhabit Easter Island. Everywhere they visit, photographs are to be taken, and when the ultimate destination, Singapore, is reached, the party hopes to have one of the most valuable photographic collections of South Sea information in existence.

Assistance Will Be Given  
Dominion To Stand Behind Provinces In Relief Matters

Ottawa, Ont.—The Dominion will contribute and where necessary loan to the provinces the matter of direct relief; a percentage of relief costs yet to be determined will be paid to the provinces; and if a province cannot at the moment to pay its share, the Dominion exchequer will loan this amount taking in security treasury bills.

This assistance of the Dominion Government was made clear in the House of Commons by Hon. W. A. Gordon, Minister of Finance, during consideration of the unemployment relief resolution. The minister was answering a request for the attitude of the Administration from Hon. Mackenzie King, opposition leader, and Hon. Ernest Lapointe (Lib., Quebec East).

Amazing Spirit Manifested  
No Evidence Of Complaining On Part Of Business Men and Farmers

Vancouver, B.C.—Impressed with "the amazing spirit of optimism and hope" on the Canadian prairies, Hon. H. H. Stevens, Minister of Trade and Commerce, reached Vancouver for convocation of the University of British Columbia.

There is no evidence of whining or complaining on the part of business men and farmers in the prairie provinces," he said. "Crop prospects are good and when harvest comes there should be a wide demand for labor. It is noticeable that there is a return to the old horse power in replacing machine power on the land."

Dawson Ice Breaks Early  
For Guessing Date  
Dawson, Y.T.—The ice in Yukon River moved out in front of Dawson May 1 and 2, according to reports, deciding Dawson's annual ice sweepstakes in which guesses this year were confined solely to Dawson City and the immediate vicinity.

Total pool was \$1,200, given as one prize and won by Mrs. Angus of Gold Creek, with a guess of May 2, 7:37 p.m.

This is one of the earliest break-ups of the ice at Dawson in the memory of the white men.

Editor Arrested  
Finnish Newspaper Man Of Sudbury Whisked Away Under Police Guard

Sudbury, Ont.—Arvo Vuori, editor of the Finnish daily "Vaikua" and Martin Parker, translator, arrested in a Royal Canadian Mounted Police raid on the newspaper office, were loaded into an automobile and rushed out of town in a southerly direction. Five plain clothes detectives guarded them.

Mounted police refused to divulge the destination of the car bearing their prisoners and declined to discuss the case.

Naval Appointments  
Ottawa, Ont.—The appointment of Commander V. C. Brodeur as commander-in-charge at Esquimaux, B.C., effective from May 27, was announced by the Department of National Defence. It was also announced that Commander C. J. Jones would take command of H.M.C.S. Ikenau, and the western division on May 25.

Death Toll Heavy  
Job, Philippine Islands—Related reports brought the number of persons killed by the latest typhoon in the recent typhoon to at least 65. It is feared that many others are dead. The authorities estimated that 65,000 were rendered homeless.

Here are two of the first pictures to be made of the new German navy built to replace the Imperial Navy which was scuttled at Scapa Flow, Scotland, after surrender to the British. The cruiser Königsberg is shown at anti-aircraft gunnery practice, during recent maneuvers in the Baltic Sea. Note that the men are equipped with the latest type gas masks. Inset shows some of the ships of the fleet in line.

## Indians Getting Franchise

Many Being Recognized As Entitled To Full Citizenship

Ottawa, Ont.—The enfranchisement of Indians is proceeding with individual cases receiving full citizenship by order-in-council, as circumstances warrant. Hon. T. G. Murphy, superintendent-general of Indian Affairs, told Dr. Peter McMillan (Cons., Muskoka), in the House of Commons. Dr. McMillan said in his constituency were two bands of Indians, to whose intelligence and industry he paid high tribute. They wanted full citizenship, and Dr. McMillan felt it ought to have it.

Churchill Insurance Rates  
Effort To Be Made To Secure Lower Rates On Grain Shipments

Ottawa, Ont.—Every effort is being made to secure insurance rates that will encourage grain shippers to use the new terminal facilities at Churchill on Hudson Bay, Hon. C. H. Cahan, secretary of state, advised the House in answer to questions.

The Imperial shipping board in England secured a reduction in the rate in 1931, Mr. Cahan said, and there were hopes of further reduction in the near future.

Grain Shipments  
Reported For Russian Points

Vancouver, B.C.—The Vancouver Star publishes the following: "Coming as the most significant development in the Vancouver grain season, confirmation was secured of the sale of 1,500,000 bushels of grain for shipment to Russia from this port."

Five vessels have been chartered to carry it to Vladivostok. The "Customer," now loading here, are not named, of the other four have not been disclosed.

With Russia three months ago regarded as the greatest menace to other wheat exporting countries, now back in world markets as a buyer, 10,000,000 bushels of wheat would move through Vancouver to Siberia in the next few months.

"The 40,000 tons of grain going out on these five ships for a coming summer channel untroubled of six weeks ago are generally understood to be supplies for Russian troops assembled in Siberia since the Manchurian grain trouble with Japan."

"Not a great deal is known about the shipments since most of the wheat was negotiated in London."

"The London office of Kerr, Nisford and Company arranged four of the cargoes, it is understood."

"Two of the ships to carry the wheat were based in London, and the other three are stated to have been secured through the Canadian Transport Company of Vancouver."

"While the requirements of the Russian military forces in Siberia are considered the chief cause of the Canadian orders, the underlying reason for the shipments is believed to be new famine conditions in the Volga section of Russia."

## BREAKERS RECORD

C. W. A. Scott, British flier, who has just set a new record for the flight from England to Australia. Scott's time for the 13,187 miles was eight days, thirteen hours and 53 minutes.

Defendants Are Freed  
One Hour Sentence Is Imposed In Connection With Massive Conviction

Honolulu, Governor Lawrence M. Judd freed the four defendants of the famous Massey murder trial one hour after they had been sentenced to 10 years at hard labor at Oahu prison.

They were: John M. Massey, his mother-in-law, Mrs. Granville Fortson, and the two seamen, E. J. Lord and Albert C. Jones.

Their hour of confinement was spent in the nominal custody of the sheriff at Island Palace, across the street from the judicial building where for several weeks they battled unsuccessfully for freedom on charges of slaying Joseph Kibakawa, asserted attorney of Mrs. Massey.

Governor Judd, in commuting the sentence to one hour, merely said he was acting on a petition of the four defendants in which they counsel joined and was commuting the sentence to one hour.

Protests Against Use Of American Ports  
Maritime Senate Thinks Route For Canadian Grain Should Be Changed

Toronto, Ont.—Senator W. H. Dennis, of Halifax, told an interviewee it was "difficult for the people of the Maritime to find justification for shipment of millions of bushels of Canadian grain through United States Atlantic ports."

He said United States railways and waterfront workers were being provided employment handling Canadian grain while "the great Atlantic seaboard ports of Halifax and Saint John were idle as regards Canadian grain traffic."

Had Money In Bank  
Hamilton, Ont.—Buried as a pauper recently, Obadiah Markle had \$14,000 in the bank. Markle died in a rooming house, and his landlady recently found a bank book bearing a record of deposits. Investigation proved the money was actually there.

## Prepare For Conference

Alberta Arranging For Suggestions To Present To Imperial Parley

Edmonton, Alberta.—First steps toward preparing an Alberta statement for submission to the Imperial Conference in Ottawa next July are now being taken, it was announced by Premier Brownlee. As a preliminary step, he is being sent to organizations representing the economic interests in the province, in which they are invited to forward any suggestions they may have to offer.

It is expected that the Dominion Government will extend an invitation to the provinces to submit suggestions as to the position to be taken by Canadian interests at the conference.

The Alberta Government will also participate in a joint conference to which the Saskatchewan Government has invited its two neighboring provinces and which will be held about June 8. An exchange of views in preparation for the Ottawa conference will be the purpose of this interprovincial meeting, but Mr. Brownlee points out that it may not be found possible to make a joint representation, inasmuch as the interests and resource of this province are much more varied than those of the other two provinces.

Curtail Waste Of Gas  
Steps Are Taken To Cut Down Gas Production In Turner Valley

Calgary, Alberta.—Turner Valley gas conservation board, formed by the government to curtail the waste of gas in Turner Valley gas field, announced that orders would be issued immediately requiring oil companies to cut down gas production. The board has set a production limit of 200,000 cubic feet daily in an effort to prolong the life of the gas fields.

It is understood oil companies will be informed that they have 48 hours to reduce their gas yield to conform with the board's objective. It is expected gas production will be curtailed greatly and most of the waste gas flares at the Turner Valley fields practically extinguished.

The board members have elected A. A. Carpenter chairman. Other members of the board are John M. Lash of the Department of Mines, Ottawa, and Dr. B. C. Wallace, president of the University of Alberta.

Passed Both Houses  
Royal Assent Is Given To Number Of Bills

Ottawa, Ont.—Justice Anglin, as Deputy to the Governor-General gave royal assent in the senate to a number of bills which had passed both houses. These bills include the following: To amend the patent act; to amend the Copyright Act, 1909; to amend the Yukon quarries mining act; to amend the Canadian Pacific Railway Company; to amend the destructive insect and pest act; to incorporate the Lake of the Woods International Bridge Company.

Protest Telephone Tax  
Ontario Independent Telephone Companies Interview Premier Henry

Toronto, Ont.—Representatives of Ontario independent telephone companies interviewed Premier Henry, to petition against payment by them of Dominion tax on long-distance telephone calls. The delegates argued that the Dominion tax was a burden on companies operating under provincial charter, and therefore were not legally under the Dominion Government tax law.

Premier Henry requested Hon. H. Price, Attorney-General, to submit a ruling in the case.

Honored By Canadian Press  
Presentation Made To John Scott At Toronto Meeting

Toronto, Ont.—Members of the Canadian Press honored John Scott, managing director of the Toronto Mail and Empire, in recognition of his services as a bounteous system of the products of some primary industries. The bill contained no limit on the money that might be expended by the Dominion.

The back-to-the-land movement, if encouraged by the government should be a boon to crown lands, said W. W. Kennedy, (Cons., Winnipeg South Centre). He knew of many good farms which had been returned to the municipalities for various reasons, and it was to these farms already partially cultivated and equipped with a bounteous system of the products of some primary industries.

Will Not Modify Bill  
Dublin, Irish Free State.—The Republican Government of the Irish Free State effectively put down two opposition amendments which would have modified its bill to abolish the oath of allegiance to the British crown as a requisite to tenure of public office.

Will Use Regular Service  
London, England.—The British delegation to the Imperial Conference at Ottawa will travel by the normal passenger service across the Atlantic and not in a vessel of the royal navy. This was the reply in the House of Commons to a query by Thomas Griffiths, Labor member.

## NUDE PARADES GIVEN 3 YEAR TERMS IN JAIL

Nelson, B.C.—Sentences totaling 354 years were handed out by Magistrate John Cartmel to 84 Doukhobor men and 34 Doukhobor women, members of the Sons of Freedom sect, following their conviction in police court here of parading in the nude in public at Thirton, B.C., in each case a term of three years in the penitentiary was imposed. All admitted their guilt. The 118 accused were heard and sentenced in 120 minutes. The men and women were arrested after battling the police for 40 minutes.

Pete Maloff, leader of the element, took his sentence with a smile after admitting appearing in the nude, wailing to his cell and with a smile said "I didn't know you." There was little trouble with the men, but the women in some cases protested their sentences, declaring they had stripped but were praying for clothing.

The convicted men will be sent to New Westminster penitentiary to serve their sentences, and the women to Kingston, Ont.

Hardly had Hon. H. R. Pooley, Attorney-General, who came from Victoria to warn Doukhobors against further violations of the law in staging nude parades, concluded his ultimatum to the Sons of Freedom at Thirton, that they must stop the law or go to jail, when five or six women members of the sect disrobed and paraded in the nude before the attorney-general and his party. No arrests were made. Other women of the group demanded to be taken to jail to join the parade.

These were the only untoward incidents in the visit of Mr. Pooley to the district.

Bill Is Drafted To Deal With Unemployment

Ottawa, Ont.—The House of Commons took the first step to clothe the government with wide powers to combat unemployment. A bill was given first reading which would confer almost blanket power on the ministry until the end of the fiscal year next March. Debate on the resolution which prefaced the introduction of the bill was desultory.

Under the terms of the bill, which would confer concerted authority in its later stages, the government would possess power to negotiate agreements with the provinces, grant financial assistance to them and take steps "to protect the credit and financial position of the Dominion or any province." Money might be loaned to public or private undertakings. One clause of the bill would enable the government to "assist in developing the production of the field, farm, forest, sea, river and mines."

This has given rise to speculation concerning a bounty system on the products of some primary industries. The bill contained no limit on the money that might be expended by the Dominion.

The back-to-the-land movement, if encouraged by the government should be a boon to crown lands, said W. W. Kennedy, (Cons., Winnipeg South Centre). He knew of many good farms which had been returned to the municipalities for various reasons, and it was to these farms already partially cultivated and equipped with a bounteous system of the products of some primary industries.

London, England.—The British delegation to the Imperial Conference at Ottawa will travel by the normal passenger service across the Atlantic and not in a vessel of the royal navy. This was the reply in the House of Commons to a query by Thomas Griffiths, Labor member.

## Fish In Hudson Bay

Pioneer Fishermen To Make Through Exploration Of Northern Waters This Season

Given aid by the Federal Government John Ingelbrechtson, pioneer fisherman in Hudson Bay, will explore the fishing grounds of the Bay as far north as Hupples Bay, 150 miles north of Churchill.

There are salmon as well as salmon trout in the waters of Hudson Bay. Ingelbrechtson, who with five fishermen sailing in the vessel "The Utu Svendrup," made an investigation of the waters of the west coast of the Bay north of Churchill last summer, and found fish in commercial quantities. The expedition found sufficient fish on their initial venture to pay the expenses of the summer, but they came away without surplus to start this season's work.

Mr. Ingelbrechtson claims that it he can obtain a reliable outfit this year he and his men will go as far north as Hupples Bay, which lies some 150 miles north of Chesterfield field. The object is to get up as near the ice as possible as the fish are most plentiful in such regions, he claims. Further south and in the vicinity of Churchill, the abundance of whales and seals has a tendency to frighten the commercial fish, including salmon, cod fish and other species, away from the water. Near the northern ice fields whales and seals are rarely seen in summer, he says.

Last summer the fishermen explored about 250 miles of the west coast line of the Bay. This year they plan to explore some 300 miles more, this to be in the northern field, where they believe there is more fish.

## Cold Symposium

Two Hundred Experts Will Attend Meeting In Ottawa

Two hundred experts in colloid chemistry—the chemistry of emulsions and such non-crystalline substances as wood, rubber, leather, resins, grain, wool and silk—are expected to be in Ottawa from June 16 to June 18.

In 1922 the American Chemical Society called the first colloid symposium. One has been held annually since that year. The fourth was held in Toronto in 1926; the fifth, which is to be held in Canada, is to assemble here in the New National Research Laboratories Building now being completed.

Dr. Emil Hatschek, who has been actively engaged in the study of colloids for the past 25 years, is the author of four books on the subject and lecturer on colloids at the Sir John Cass Technical Institute, London, England, has consented to give an address at the Ottawa meeting.

At least eight Canadians are to deliver papers.

Dr. G. B. Whitby, Director of the Division of Chemistry, National Research Laboratories, is head of the general committee in charge of arrangements for the meetings.

## Export Handicapped

Canadian Products Sold To Lack Uniformity Of Quality

Hon. H. H. Stevens, Minister of Trade and Commerce, says the departments of representatives in Great Britain are handicapped in their efforts to maintain the flow of Canadian products in that country by lack of uniformity of quality and indifference regarding continuity of supply on the part of Canadian exporters. The complaints regarding lack of continuity of supply have been made in regard to a number of commodities, including cattle, bacon, eggs, butter and canned goods, while lack of uniformity of quality has been periodically alleged against certain others. There are shortcomings, he says, that he overcomes forthwith if Canada export trade is to thrive—Toronto Mail and Empire.

Austria's twenty-third international sample technical fair will be held in Vienna in September.

## NOTES ON GARDENING

A Supply Of Flowers For Bouquets May Be Grown In The Vegetable Garden

To avoid marring the beauty of the regular flower garden by putting bouquets, a supply of flowers should be grown in the vegetable patch for this purpose only. Here too are produced those flowers such as aspidistra, anemones, sweet peas, and corn flowers which have beautiful blooms but poor foliage. Planted in rows with vegetables and receiving regular cultivation these are more easily looked after than when grown in the flower garden and, of course, they may be cut freely without disturbing any border.

**Building and Filling Window Boxes**  
Hanging pots and window boxes will add to the attractiveness of any home. Boxes can be purchased and stained green or any other color to blend with the surroundings, though arrangements will have to be made for supporting them. They should be placed in such way so as not to obscure too much of the window when the plants are growing, and they must be very strongly supported by stout wire or some device that will weigh very considerably when filled with earth. In building your own, use inch lumber and use round corner screws are inserted. These can be purchased at any hardware store, and they will be found to be worth the money for the work.

White residents of far-away Hong Kong have recently been introduced to a new fish food from British Columbia in the shape of frozen herring and they are reported to have received it with relief. Enterprising fish people in British Columbia, alert to find and develop new markets, have discovered that their frozen herrings are welcomed in the British settlement at Hong Kong.

For many years past British Columbia fish producers have done a large business with China in dry-salted herring, but the export of frozen herring to Chinese ports is a new departure. The dry-salted herring shipped to China are used by the Chinese people themselves, while the sales of frozen herring in Hong Kong have been made to white consumers.—Fisheries News Bulletin.

## Real "Alice" of Wonderland

Many people whose happiest childhood days were spent over a copy of Lewis Carroll's immortal "Alice in Wonderland" will soon have a chance to see the original Alice who inspired the famous story, in the person of Mrs. Alice Carroll, who is coming from her home in England to attend the Lewis Carroll celebrations at Columbia University, New York. Mrs. Carroll is shown at the left as she appeared when a girl; and at right as she is today.

## Market For B.C. Fish

Frozen Herrings Are Finding Ready Sale In Hong Kong

White residents of far-away Hong Kong have recently been introduced to a new fish food from British Columbia in the shape of frozen herring and they are reported to have received it with relief. Enterprising fish people in British Columbia, alert to find and develop new markets, have discovered that their frozen herrings are welcomed in the British settlement at Hong Kong.

## To Speed Mails

Planes To Be Catapulted From Ships At Sea

German seaplanes, catapulted from the decks of the North German Lloyd liners "Bremen" and "Europa," will make 38 scheduled ship-to-shore flights with trans-Atlantic mails, according to an announcement.

Undated by the tragedy last year, when the seaplane New York, from the "Bremen," crashed on Cobequid Bay, N.S., and carried two aviators to their deaths, the company now intends to undertake a permanent service. The route, with a stop at Sydney for fuel, was marked by Joachim Blankenburg and Karl Kirckhoff during a successful flight last September.

The first flight this year will be westbound, a plane catapulted at sea 600 miles east of Sydney and flying to Sydney and thence to New York via Cape Cod.

One of the questions in a general knowledge test held at a local preparatory school was:

"Who is Bernard Shaw?"

Among the replies was:

"The old man who always puts his photo in the paper."

Although all ingredients had been imported 1,000,000,000 pounds of macaroni were made in Switzerland last year.

## Wanted Plenty Of Action

Theatre Box Office Man Given Unusual Surprise

One recent morning a gentle peace pervaded the box office of the John Golden Theatre, New York, where "Riddle Me This" with Frank Craven and "The Great Gatsby" with Richard Dix were being held. It was a trifle too early for the customary queues of theatre-goers to form at the ticket window and Richard Hopkins, house manager, was loitering at his counter.

Presently, from the corner of an eye, he noticed a limousine draw up at the curb on Fifty-Eighth Street, and a neatly dressed chauffeur leap to the sidewalk and open the door. There stepped from the confines of the limousine a little, white-haired lady, with a small lace bonnet perched on the summit of her modest coiffure. She moved timorously across the pavement and came to the window.

"If you wouldn't mind," she said shyly, after taking out her purse, "I would like to ask a question about this play."

"Why, of course," said Mr. Hopkins. "What do you want to know?"

"This is, ah, a play about a murder, isn't it?"

"Yes, ma'am, it is."

"Tell me," she said, "are there any pistol shots?"

Mr. Hopkins smiled. He was relieved.

"No, Madam," he replied. "You have nothing to fear. There is not a single pistol shot in the whole play."

"Not one?"

"Not one. Not a pistol shot! No, not even a loud noise."

"No pistol shots?"

"None."

"Well, then," said the old lady, firmly, "I'm sorry." She took back her money and put it in her purse.

"When I go to the theatre, I want pistol shots—good loud ones."

And with that, she moved out of the theatre again, stepped into her limousine, and was driven, at a snail's pace of safety, away. Mr. Hopkins returned two seats to their place in his rack.

"Oh, save my hair! Save my hair!" she cried, pointing to a wig rapidly drifting out to sea.

"Madam," replied the gallant lieutenant, as he took a firm grip on her shoulder. "I'm only a lifesaver, not a hair restorer."

## Fighting The Bergs

Patrol Of The North Atlantic Steamer Lanes By U.S. Navy

Immediately after the "Titanic" catastrophe the United States Navy established the first ice patrol on the north Atlantic steamer lanes, and it has been continued ever since, the work being done by the United States Coast Guard and paid for by fourteen maritime nations whose ships it defends. It is a warfare almost wholly of strategy. Attempts have been made to destroy the bergs, but have never succeeded. The only thing to be done is to meet the invasion when it appears in early spring, to predict its course and probable extent by study of currents and temperatures, to plot and broadcast the position of individual bergs as they approach the steamer lanes and track them until they are disintegrated by their natural enemies—sun and warm weather. Each year two Coast Guard cutters spend some four months or so along the battle line between the Gulf Stream and Labrador current, acting as a general staff for the merchant ships until the invasion is past.

Sometimes it is an invasion in force. In the "Titanic" year more than a thousand bergs came down into the vicinity of the Grand Banks; in the last spring for the first time in twenty years that the war has been on, not a single berg got past the danger line over the tail of the Banks in 43 degrees north, and only four got south of Newfoundland. The Coast Guard improved the opportunity to patrol the lanes into the ice waters, expecting to find the ice yards stranded along the coast of Labrador as a result of the warm weather. The waters were discovered, however, though much had already perished by the time the Coast Guard got there. The patrol is now out again, and may not be back until July. The life, it is said, "is not so hard or tedious, the work is interesting, and it is well worth the effort."

The patrol might not have saved the "Titanic," since she was warned and failed to slow for them; but the patrol is an important way, since it prevents the loss of twenty years ago, not a single life has been lost on the steamer lanes through collision with ice.—New York Herald-Tribune.

## People Have Strange Taste

Tattoos Tell Of Queer Desires Chosen By Clients

An instance of the peculiar tastes of some people is recounted by Candide in the Sunday Pictorial, who reports an interview with Prof. Barrett, tattooist, of London, England.

"A number of titled women are among my clients," said the Professor proudly. "Often I see a society's beauty's picture in the paper and say, 'This is the woman I want to tattoo.' I have just tattooed, say, a butterfly on her leg. He went on to tell interesting details. Things like this: 'I have just tattooed a lady who is a well-known woman got me to put two large green snakes round her.'"

A surgeon whose name is often in newspapers is also decorated with similar thoroughness; but many people who call at the little shop do so for more ordinary beauty reasons. "I have just tattooed an actor," the Professor told me. "I put some color in his cheeks and whitened his nose, and now he looks a new man. One man recently insisted that a scar should be tattooed across his face, while a woman brought in a child to have two small birthmarks tattooed."

## One Form Of Madness

Nations Needing Money Spend Billions Yearly On Armaments

Every day new evidence is afforded that this is a mad world. The nations are headed for bankruptcy yet they are spending more than four billion dollars yearly on armaments—think of it, \$4,000,000,000. All of these have announced the right to wage war. And a hundred millions of their people are in dire want. The nations are in a mad race now proceeding at Geneva conference for a fifty per cent. reduction in expenditures on armaments, to be made effective progressively, the ultimate saving would be two billion dollars per year or five million dollars per day. Of this saving \$1,200,000,000 would be made by Europe, which is close to economic collapse, and \$350,000,000 by the United States.

Until the masses of the people everywhere join with business interests in demanding that the waste of money on military preparations be curtailed, the world will continue that form of madness.

Teacher—Sammy, do you know what a gentleman farmer is?  
Sammy—Yes, ma'am. It's a man who loves cows but don't know how to milk 'em.

## Vancouver's Shipping Growth

Both Exports and Imports Show Increased Volume and Outlook Is Encouraging

Flour, grain, canned salmon, lead, logs, lumber and newspaper, comprising the basic industries of the west, had all increased export volume during the first three months of the current year. F. C. Brown, chairman, said in presenting his annual report to the British Columbia division of the Canadian Manufacturers' Association. Although exports through Vancouver, compared with the same period last year, increased eleven per cent, while imports had increased six per cent. In the case of grain exports, the increase amounted to more than three million bushels.

The neighboring port of New Westminster showed an even more remarkable advance. Its exports increased thirty-six per cent, accounted for chiefly by lumber, while its imports had almost doubled.

"It does believe that the bottom of commodity prices has at last been reached, and it is reasonable to look for an improvement from now on," Mr. Brown said. "I would even go so far as to say that this improvement is already in evidence in some instances."

Referring to Vancouver as a grain port, he said: "We are justifiably proud of our record of having in the last three years, from a very small beginning achieved the position of being the leading grain shipping port to the west coast of the continent."

"We are none the less proud of the fact that in carrying on this development, we have thereby created another community of interest with prairie provinces."

## Tooth Of Baby Mammoth

Interesting Discovery Is Made In Saskatchewan Vegetable Garden

A baby mammoth shed one of its milk teeth and probably shed baby mammoth teeth some 5,000 to 10,000 years ago, where W. A. Wilson of Regina, Sask., found his vegetable garden.

The tooth, wonderfully preserved with the enamel still of the best ivory quality, was found by Mr. Wilson to the geology department of the University of Saskatchewan and was reported for identification to C. M. Sternberg of the geological survey at Ottawa, who is an authority on mammoth teeth. It was identified as the second lower milk molar from the left side of the jaw of a baby "Elephas Primigenius."

It is not a great tooth like that of the mammoth whose skeleton was disinterred by a road construction gang at Weston last year. The tooth, however, or perhaps one should say the sucking, surface of the tooth is about 2 1/2 by 1 1/4 inches.

Mr. Sternberg says that finds of first and second molars are rather rare.

"I wish I knew how to make a barrel of money," sighed the Little Man.

"That's easy," replied the Big Man. "If you had a barrel of money in advertising and you'll soon have a barrel of money."

Colorado's sand dunes, unlike waves of nature in a land that knows more rock than sand, are attracting many tourists. The dunes are so smooth that skis can be used on the sand.

Government scientists say that the slow process of erosion has changed the surface of the earth more than all the earthquakes, volcanoes, tidal waves, tornadoes and excavations in history.

Because illiteracy is so prevalent in China, its leaders find the ratio of inestimable value in unifying the country.

Residential rents in Hawaii are gradually dropping.

"My husband tells me I'm not long his sleep."  
"Well, you should let him get in a word in the daytime."—Muskrat, Vienna.

## FANCIFUL FABLES

W. N. U. 1941

# Some Of The Advantages As Well As Disadvantages In Growing Of Reward Wheat

(By H. G. L. Strange)

As the wheat fields in Western Canada began to extend northward the last was felt for a wheat variety that would mature earlier than Marquis, so as to avoid damage from early fall frosts. Several new varieties had been produced by plant breeders to fill this purpose, notably the Red Boga selections, originated by Dr. Boga Wheeler, Supreme, Early Triumph and Red Boga 222, the latter having been re-selected by the University of Alberta, also the varieties Garnet and Reward produced by the Dominion Experimental Farms, Ottawa.

Because of its high yield Garnet wheat quickly became popular and the last few years has increased by leaps and bounds in Northern Alberta and Northern Saskatchewan. Some concern, however, has been felt that because the milling qualities of Garnet are somewhat different to those of Marquis, and because Garnet has a slightly yellowish tinge, that the quality and reputation of Canadian wheat on the world's markets might be harmed if too large an amount of Garnet should be grown.

Because of this concern some have recommended that some of the other varieties might be better. Reward wheat is one that is widely recommended.

Reward was originated at the Dominion Experimental Farm, Ottawa, and is the result of a cross between Marquis and Prelude made by Dr. Charles Saunders in 1912. Under the direction of Mr. L. H. Newman, the present Dominion Cerealist, the variety was tested for several years by several hundred co-operators. Finally the variety was released by the Minister of Agriculture for further trials by farmers in 1928.

Reward wheat has this year been accepted for registration by the Canadian Seed Growers' Association, which means that the scientific plant breeders of Canadian institutions consider that the variety is of good economic value and is well-suited for use in Western Canada. There can, therefore, be no need for hesitation in the use of this variety by any farmer who finds that their districts and farms are suited to Reward wheat. The Dominion Cerealist has now standardized the variety and Registered Seed of Reward, true to variety and reliable in the sack, will undoubtedly be available to farmers in the near future.

The official description of Reward wheat is as follows: Time of maturity 5 to 6 days earlier than Marquis—height of plant 3 to 4 inches shorter than Marquis on the average—strength of stem a little stronger than Marquis—seeds almost except for a few short apical awns, usually irregular in length, glume covering, slightly to heavily pubescent (or hairy), depending on season of growth, reddish color red, usually darker than Marquis, grain texture hard, rarely plump or starchy.

The head of Reward is generally shorter and more lax than Marquis, while the spikelets are usually more or less irregularly arranged, giving the head a characteristic ragged or spiral appearance. As previously stated the glumes are pubescent or covered with short hairs which can usually easily be seen with the naked eye, magnifying glass. This is one of the ways with a magnifying glass. This is one of the characters that help in identifying the variety.

The milling and baking values of Reward wheat are excellent. It gives a high yield of flour. It bakes well, bread, giving a large well piled loaf of excellent color and texture. The berry is uniformly plump, of a clear red color, seldom being piebald or starchy. This is the reason this variety will often bring No. 1 Hard and No. 1 Northern in the Northern districts where Marquis and some other

sorts seldom obtain better than a No. 3 grade.

The straw is shorter and stiffer than in either Marquis or Garnet, and in wet years Reward will often stand up when some other varieties, particularly Garnet, do not. The chief strength in the kernel, which enables it to stand a considerable amount of moisture in the fall without sprouting in the stock, such as often happens with other sorts, particularly with Marquis.

It is from 5 to 8 days earlier than Marquis, or about as early as Garnet wheat in most places, although in other places it is 2 or 3 days later than Garnet, but it is always earlier than Marquis.

Weights very high to the bushel. Usually two or three pounds more than Marquis or Garnet or other sorts. Weights of 65 and 66 pounds to the bushel are quite common with Reward wheat. Reward is probably the best of all varieties of Hard Red Spring Wheat for Exhibition purposes. Its high weight per bushel, bright, golden, pleasing color of good straw usually win it a high place in competition with other varieties.

Reward wheat is not a rust resistant wheat, but because of its earliness in rust years often suffers less damage from rust than many of the other varieties. Investigations show that Reward wheat does not suffer as much as some of the other varieties, particularly Garnet.

On rolling land wheat on the high ridges usually ripen before that in the low spots. Reward will stand on these high places uncut after ripening, the berry shrinking or discoloring, thus the whole field can be allowed to ripen thoroughly before cutting; this is a considerable time saving. One's mind naturally runs to thoughts of dimly plants, batonette plants, etc., for such a dress. But there are other materials such as dotted, striped or plain linen, cotton mesh, tub silk, etc., which could enter the running, too. For this model a blue and white dimly print with blue blue lines was chosen.

Style No. 304 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 2 1/2 yards of 36-inch material with 7/8 yards of binding. Price of pattern one cent in stamps or coin (coin is preferred). Wrap card carefully.

## An Old Advertisment In Business Matters

A cleverly written advertisement gives the idea of an enterprising business man in Egypt in the third century B.C., has been discovered by Dr. Reich of Dropsie College. The advertisement, written on a small stone, has been deciphered as follows:

"Dreams I explain, holding the commands of the Gods Good fortune! A Crete will interpret them." This old advertisement was found by Dr. Reich as he examined a number of inscriptions from the Temple of Serapis, near Memphis. The dream interpreter's sign had been strategically set up before Avenue of the Sphinxes, which led to the temple. Along this avenue passed Egyptians who came from near and far to spend a few days on the temple grounds. They came in order to sleep there and have their dreams interpreted by the priests, who were the official and paid dream interpreters. The stranger from Crete was therefore daringly edging himself into the dream business against formidable competition of the priests—Toronto Telegram.

No less than one out of every ten gallons of gasoline is wasted through failure of motorists to replace worn-out spark plugs, according to tests conducted by the University of Pittsburgh.

"I met your husband yesterday, but he didn't see me."  
"I know. He told me."

Economic improvement in French Indo-China shows increasing momentum.

Havana, Cuba, has a population of over 600,000.

## Winnipeg Newspaper Union Fashion

## 304 A LIKABLE LITTLE MORNING DRESS, FRESH LOOKING AND COOL

Don't you love it? It is a dress you can wear when you are "doing things" and feel just right in it. It has no fussy bits and ends to get in the way of your gardening, making the house at home, etc. One's mind naturally runs to thoughts of dimly plants, batonette plants, etc., for such a dress. But there are other materials such as dotted, striped or plain linen, cotton mesh, tub silk, etc., which could enter the running, too. For this model a blue and white dimly print with blue blue lines was chosen.

Style No. 304 is designed for sizes 36, 38, 40, 42, 44 and 46 inches bust. Size 36 requires 2 1/2 yards of 36-inch material with 7/8 yards of binding. Price of pattern one cent in stamps or coin (coin is preferred). Wrap card carefully.

## Just An Old English Custom

A. R. Garner may be truly said to carry his responsibilities lightly as he observes an old English custom and carries his bride, the former Miss Marjorie, through the door of St. Gabriel's Church, Yorkville, after the ceremony.

## Recent Discovery Interests Astronomers

May Be Asteroid Nearer To Earth Than Any Yet Found

Astronomers at Mount Wilson Observatory and others in this country and Europe are keeping a close watch on Delport's "object," an asteroid or comet discovered recently by an astronomer at the University of Brussels.

"Our observations of it have disclosed no light and seemingly only reflected light," said Dr. Frederick H. Sears, indicating that it is an asteroid and one much closer to the earth than any yet found.

It is assistant director of the local observatory, a branch of the Carnegie institution of Washington.

"Discovery of an asteroid nearer the earth," Dr. Sears said, "would enable us to obtain a more accurate value of the distance from the earth to the sun, upon which the measurement of distances to all heavenly bodies is based."

"We are much in the position of a surveyor computing the width of a river by 'shooting at a given point across the stream from two different points on his side of it, and determining the angles of the imaginary triangle. The narrower the stream the more accurate his measurement will be."

"Our computation of 93,000,000 miles as the distance of the sun from the earth is based on the distance of 13,000,000 miles as the distance from the earth to Eros, the nearest asteroid yet found."

## Prices May Be Better

Possibility Of Advance In Wheat Predicted By U.S. Official

A "strong possibility" of better wheat prices are seen by George S. Milnor, president and general manager of the Grain Stabilization Corporation. In a statement Milnor said:

"While in Europe I visited France, Italy, Germany, Belgium and England, and also met our foreign representatives from other countries. Europe will receive rather heavy imports of wheat between now and the harvesting of their new crop. Russia has practically completed the shipment of her wheat surplus from the last crop and the supplies from that source will be negligible until after harvest. Therefore, Europe must look principally to Canada, the United States and Argentina for their supplies."

## Empire Reforestation

B. C. Douglas Fir Now Grown Extensively In England

During the eleven years ending in September, 1930, the Forestry Commissioners of Great Britain planted a total of 32,350,000 Douglas fir trees on various sites in England, Wales and Scotland. All these trees were raised from seed furnished by the Forest Service, Department of the Interior, through their seed-extension plant at New Westminster, British Columbia. A considerable quantity of seed of other western species was furnished to the Commissioners from the same source. The New Westminster land Government also took a large quantity of tree seed.

Russia announces the successful production of rubber from a plant named "towagwa."

### Rainy Lake Map Sheet

Lake Country East Of Winnipeg Is A Paradise For Canoeists

Very informative and interesting is the Rainy Lake Map Sheet of the National Topographic series, recently published by the Topographical Survey, Department of the Interior, Ottawa.

The map covers the country along the international boundary from Quebec, Ontario, Provincial Park on the east to within thirty-three miles of the town of Rainy River on the west. In addition to agricultural, mineral, forest and water power resources embraced in the area, it is known as a great hunting and fishing region. The Port Arthur, Rainy River and Winnipeg lines of the Canadian National Railways runs through the district from east to west, picking its way through the maze of lakes and rivers which were the means of transportation from the time of the opening up of Western Canada until the railway came, about the beginning of the present century. The lakes and broken country are a paradise for the canoeist, fisherman, and the hunter, and the waterways are so intricate that the voyagers and trappers of the fur companies from the time of La Verendrye onward were always searching for shorter routes for the carriage of their furs and trade goods.

The chief center of population in Port Francis, named after Lady Simpson, the wife of Sir George Simpson, one of the famous governors of the Hudson's Bay Company. Port Francis is situated on Rainy River a few miles below the point where it emerges from Rainy Lake. Near it are shown the water powers with which its name is associated. On the south side of the river in United States is the town of International Falls. The agricultural areas are chiefly in the western portion, extending from Port Francis to the townships indicated on the extreme western edge of the map.

The railways and highways in United States which bring travellers and tourists into this part of Canada are also shown. The map which is more complete topographic detail of this district than any previously issued, may be had at a nominal price upon application to the Director of the Topographical Survey, Department of the Interior, Ottawa.

### Canada's Dairy Industry

In A Critical Condition Opinion Of Conference Held In Ottawa

The dairy industry throughout Canada is in a critical condition. That was the conclusion reached at a conference held in Ottawa on April 11 and 12. Delegates were present from most of the provinces and the gathering was said to be thoroughly representative of the whole industry. It was declared unanimously that the situation has been brought about first, by failure to keep abreast of the world in methods of milk production and, secondly, by world-wide competition and prevailing economic conditions. The remedy for the one lies to a large extent in our own hands but the cure for the second is not so easily cast.

One of the remedies suggested was to pay a bonus upon all butter exported from Canada through a levy upon the production of butter in Canada. This policy has been followed with success by Australia and South Africa and it was strongly urged by the delegates that Canada should do the same and some of those from the east. The conference was unable to reach a decision on the proposal.

It was called at the request of Hon. Robert Weir, Minister of Agriculture, and Hon. H. H. Stevens, Minister of Trade and Commerce. Among the recommendations made was the following: "That your Government announce that an emergency has arisen in the dairy industry of Canada and take steps to launch at the earliest possible moment, a nation-wide campaign to increase the efficiency of the dairy industry, through an educational campaign designed to lay the facts of the situation before all interested in the industry."

Canada has for years had nine departments of agriculture in as many different provinces, in addition to numerous agricultural colleges and courses. It seems strange if their united efforts have produced as little effect upon the dairy industry as the conference at Ottawa has indicated.

Another thing that doesn't turn out as you wish is the auto about it.

Great Britain and the United States fought for their battleships at the Arms Conference at Geneva, forming a defensive alliance against an organized offensive of the small powers who wish to classify all ships over 10,000 tons as aggressive.

The small powers would abolish battleships or internationalize them within the League.

The United States and Britain received modern gun-coastal Japan and lukewarm encouragement from France.

Senator Claude A. Swanson, of Virginia, announced at the meeting of the naval commission that the United States unequivocally opposed classifying nations as an offensive weapon. They are the backbone of the United States defense system, he said, and "a threat to no nation," since we covet no one's territory. He stressed the United States obligation to keep the Panama Canal open in peace and war and to defend its Far Eastern possessions.

Speaking and gesturing in a senatorial manner, he continued:

"If we had completed our naval programme after the war, it is conceded we would have been supreme on the sea, but we agreed to be a threat to no nation. The battleship is cheaper and more effective for defensive purposes than to build fortifications along our coastlines. Battleships have saved us a great and expensive army for defense purposes."

"We realize that naval power plus power would make us a danger to every nation. We only wish the people who have armies had gone as far as the naval people in reducing and limiting."

He declared cruisers to be of greater offensive value than battleships, particularly in preying on commerce blockade-ading.

Vice-Admiral A. D. P. R. Pound, of Great Britain, supported Swanson, declaring that the naval superiority, not capital ships, enables attacks on trade. Similarly, he continued, it is the chain of submarines and battleships are destined for carrying out invasion.

"The capital ships of the world can now almost be numbered on the fingers of the two hands," he said. "They are the most powerful weapons in the countries possessing them. No nation is going to risk them by pitting them against coastal fortifications."

Baron von Rheinbaben, of Germany, announced that Germany is willing to sacrifice her powerful and efficient "pocket" battleships on the altar of disarmament if others scrap battleships over 10,000 tons. Defending the "pocket" ships as defensive rather than offensive, he said:

"Germany's 10,000-ton battleships cost one-half as much as your battleships. You would be saving money if you adopted Germany's restricted tonnage method of construction."

He lastly predicted the criticism made by Charles Dumont, of France, that the "pocket" ships are offensive. He replied that the charges as a myth and introduced a technical demonstration of why the light ships were built speedily and heavily armed to defend Germany against the superior tonnage of foreign attackers.

He also criticized the United States hosts of the defensive nature of battleships, saying:

"What about the blockade of our ports, which was the decisive turning point of the World War?"

### Cottage Has History

The "Lost" Rags of a cottage owned by Admiral Guy H. Burrage, at Hopkinton, New Hampshire, was built in large from the crates in which Colonel Charles A. Lindbergh's New York-to-Paris plane "Spirit of St. Louis" was shipped back to America.

Spanish cedar is grown chiefly to make cigar boxes.

"Why is your husband in such a rage?"  
"They are praising marriage over the wireless!"—Dorothy, Merion.

## About Town and Country

It is reported this week that Mr. Jack Aylsworth, a former resident of Oyen, has graduated as a doctor, and will shortly be practicing his profession.

Mr. A. C. MacDonald was a business visitor in Calgary the fore part of this week.

Mr. R. W. Hibbert, provincial secretary for the Religious Educational Council, was in Oyen visitor yesterday. In the afternoon he addressed the pupils of Oyen school and in the evening, in the United Church basement, gave an illustrated address "Whither Alberta?"

Mr. Thos. Lees who was a Calgary visitor last week, returned to Oyen last Friday.

Mr. and Mrs. Tom Swindlehurst and son of Oyen, Sask., were week-end visitors at the home of Mr. and Mrs. Howard Munroe.

Miss Mary Goldstein returned to Oyen yesterday and resumed her duties as teacher at Greenmount school. During her absence, Miss Maxine Sutherland was teacher in charge.

Mrs. P. A. Benlarsen left last Friday for Calgary.

Mr. and Mrs. John Naismith and daughter Margaret, drove into town today from Coramotion.

On Sunday, May 29, the C.G.I.T. groups will conduct service at Oyen United Church. On Sunday, June 5, anniversary services will be held in Oyen United Church.

Mr. and Mrs. T. O. Stephenson and daughters left last Friday by car for Leslieville, Alta., where they will make their home. Lloyd and Neil left the preceding day with a cartload of effects. Their many friends in this district wish them success and happiness in their new home.

Vic. Thygesen, who was "quarantined" in Calgary with his father's truck, during the provincial ban which excluded the use of motor trucks on the highway, returned to Oyen yesterday.

Mr. H. R. McMurray had the misfortune to break a leg last Saturday evening, and is now under the care of Dr. Esler at Cerebral Hospital.

Mrs. W. Campbell who has been visiting at her home near Sibbald with her young son, returned to Oyen last Saturday.

Mrs. C. Caldwell of Cerebral, was a week-end visitor at the home of her daughter, Mrs. H. Munroe.

An obituary for George H. MacNeil, late of Oyen, published in a Charlottetown, P.E.I. paper is reproduced in another column of this paper. The statement that his death occurred in Oyen is incorrect. The deceased passed away in the town of Pongak, Alta.

Mr. and Mrs. S. A. Miller and son Bert and Mrs. H. E. Gillespie left last Monday by car for Calgary to spend a few days in the city.

Mr. Ed. Mortella of Cappon, had his home and household effects destroyed by fire yesterday.

The two C.G.I.T. groups were out for a hike to Walker's grove last Friday evening.

Considerable interest is being shown in the Goodyear guessing contest which is advertised in another column of this paper. If you are a car owner, call at Johnson's Garage, get particulars of the contest, and enter your estimate. It does not cost you a cent and you may win \$1000.00.

### Here and There

Exports of Canadian wheat during the month of March totalled 9,920,624 bushels, of which 7,128,345 bushels were routed through United States Atlantic seaboard ports.

Canada's better exports to the British Isles and other countries totalled 10,620,000 pounds in 1931, as compared with only 1,180,400 pounds in 1930.

Canada's bread and bakery products industry showed production to a value of \$73,594,594 during 1930, through 2,698 establishments of which 1,071 are located in Ontario and 668 in Quebec.

March was the year's best month, to date, for pig iron production in Canada, with a total of 17,993 tons, at a rate of 560 tons per day, as compared with 362 tons per day in February and 382 in January.

W. G. Chester, dean of Canadian railroad veterans, has just retired, in Winnipeg, after 25 years in the service of the Canadian Pacific Railway and another 25 with the Brotherhood of Railway Conductors.

### What do you mean, "we" did?

A performing flea and an elephant from a circus, walked side by side over a small bridge. After they had crossed it the flea said to the elephant, "Man, oh man, we sure did shake that thing?"—O. Yeah.

On Monday and Tuesday evening a number of the members of Oyen United Church were engaged in cleaning up the church lot and planting about one hundred trees and shrubs.
